Program Modality
Hybrid

Degree Conferred
Master of Science in Clinical Investigation

Program Duration
2 years

Advertised Salary
Mean: $114K

Projected National Growth
8.2%

From 2016 - 2026 for Medical Scientists (Except Epidemiologists)

What You Will Learn

- Determine when it is and is not appropriate to use a multidisciplinary, patient-oriented research design to investigate a therapeutic problem
- Conceptualize and design multidisciplinary, patient-oriented research protocols
- Execute multidisciplinary, therapeutic intervention studies
- Interpret and report research findings using the expertise of collaborators in multiple disciplines
- Contribute to the leadership of programs that integrate clinical and translational science across multiple departments, schools, and colleges, in clinical and research institutes, and in healthcare delivery organizations
- Translate research from the laboratory to the clinic through technological innovations, such as drug therapies, medical devices, or biological materials (“bench to bedside”), as an active participant in a multidisciplinary research team
