### Environmental Science and Engineering

**Program Modality**
- Accelerated, on-campus

**Degree Conferred**
- Master of Science in Civil & Environmental Engineering

**Top Job Titles**
- Environmental Engineer
- Environmental Scientist
- Civil Engineer
- Environmental Specialist
- Water Resources Engineer

**Program Duration**
- 1 year

**What You Will Learn**
- Apply the latest technologies in drinking water treatment and wastewater treatment
- Recommend best practices for sustainability and environmental protection of water, soil, and air resources
- Select the most useful engineering approaches to protect public health from environmentally-derived hazards such as polluted water and air
- Identify and remediate groundwater and surface water issues to protect natural resources

**Advertised Salary**
- Mean: $71K
- Median: $65K

**Projected National Growth**
- 12.5%
- From 2018 - 2026 for Environmental Engineers

**Top Common Industries**
- Architectural, Engineering, and Related Services
- Management, Scientific, and Technical Consulting Services
- Executive, Legislative, and Other General Government Support
- Colleges, Universities, and Professional Schools
- National Security and International Affairs
